

INDEPENDENT REVIEW REPORT

ON RECEIPTS AND PAYMENTS

URBANRISE ONCLOUD 33

To
The Owners of Urbanrise Oncloud 33
Hyderabad

1. Scope of Review

We have reviewed the **Receipts and Payments Summary of Urbanrise Oncloud 33** relating to the Independence Day celebrations and associated activities undertaken during the period under consideration.

The statement reflects total receipts of **₹77,354** and payments of **₹67,754**, resulting in a **closing surplus of ₹9,600**.

As the Owners Association of Urbanrise Oncloud 33 has not yet been formally constituted, this report is addressed to the **Owners of Urbanrise Oncloud 33**.

2. Opinion

Based on the Receipts and Payments Summary and the supporting records and information made available to us, **in our opinion, the Receipts and Payments Summary presents, in all material respects, the receipts collected and payments incurred in connection with the activities covered by the statement.**

The above opinion is based on the records and supporting information made available for our review and is subject to the completeness and authenticity of the underlying records maintained by the persons responsible for the collection and utilisation of funds.

Accordingly, **we have no material observation on the overall presentation and arithmetical accuracy of the Receipts and Payments Summary.**

3. Control Observation

During the course of our review, we noted that the documentation maintained in respect of certain expenditure, particularly **major procurement and event-related expenditure**, can be further strengthened.

In particular, a more structured process of obtaining and documenting quotations, comparing available options and recording the basis for selection of vendors would provide greater transparency and establish a better audit trail for future reference.

This observation does not, by itself, affect our overall opinion on the Receipts and Payments Summary. However, strengthening the procurement and expenditure approval process is recommended going forward.

4. Recommendations for Expenditure Control

To improve transparency, accountability and financial discipline, we recommend implementation of the following controls for all future expenditure:

A. Three-Member Expenditure Approval Team

A minimum **three-member expenditure approval team** may be constituted from among the owners/residents until the Owners Association is formally constituted.

All significant expenditure should be incurred only with the **prior knowledge and approval of the designated team**.

The approval may be documented through written approval, email or the designated official communication group.

B. Quotations and Vendor Selection

For **major/significant expenditure**, quotations should preferably be obtained from **at least three vendors**, wherever practicable.

A brief comparison may be prepared considering:

- Price;
- Quality and specifications;
- Delivery/service terms;
- Vendor reliability; and
- Other relevant commercial considerations.

The basis for selection of the final vendor should be documented and approved. Where a vendor other than the lowest quotation is selected, the reasons may also be recorded.

The quotations, comparison and approval should be retained for future reference.

C. Approval and Payment Process

A standard process may be followed:

Requirement → Prior Approval → Quotations → Vendor Selection → Purchase/Service → Bill Verification → Payment

As far as practicable, the person initiating the expenditure should not be the sole person approving and making the payment.

D. Supporting Documentation

Payments should be supported by appropriate documentation, including:

- Bill/invoice;
- Payment confirmation;
- Approval reference;
- Quotation/comparison for major expenditure; and
- Other relevant supporting documents.

Maintaining these documents together will provide a clear and easily verifiable audit trail.

E. Advances and Emergency Expenditure

Advances should be properly recorded with details of the purpose, amount and recipient and should be settled against final bills within a reasonable period.

Emergency expenditure, where unavoidable, should be reported to the designated approval team at the earliest and subsequently ratified with appropriate supporting documentation.

F. Budgetary Control

For future community events and major activities, an **estimated budget may be prepared and approved in advance**.

Actual expenditure may subsequently be compared with the approved budget, with significant variations being brought to the attention of the approval team.

G. Periodic Reconciliation and Reporting

Receipts, payments, cash and bank balances should be periodically reconciled.

An event-wise or periodic **Receipts and Payments Statement** may also be shared with the owners to ensure transparency regarding the collection and utilisation of funds.

H. Record Retention

A central digital record may be maintained for:

Receipts | Quotations | Approvals | Bills | Payment Proofs | Advances | Bank Statements | Reconciliations

This will facilitate future verification and provide a proper record for the Owners Association once it is formally constituted.

5. Overall Recommendation

The expenditure incurred in connection with the Independence Day activities relates broadly to **sports and games, refreshments, prizes and trophies, stage and event infrastructure, housekeeping and other event-related activities.**

While the Receipts and Payments Summary is considered satisfactory based on the records made available for review, we recommend that the **procurement, approval and documentation process be strengthened for future expenditure**, particularly in respect of major purchases and event-related commitments.

The implementation of a **three-member approval mechanism, advance budget approval, quotation/comparison process for major expenditure and proper retention of supporting documents** will enhance transparency, ensure better expenditure control and safeguard the interests of the owners.
